## Headlines

Recent newspaper headlines have been carrying disturbing messages:

"WOMAN RAPED BY SEVENTEEN MEN", "CHILDREN SODOMIZED", "WOMAN EATS OWN BABY", "ANIMALS DISMEMBERED", "CHILD SACRIFICE", "HUMAN FLESH EATEN", "VICTIM OF BIZARRE RITUAL MURDER".

Such reports are not only shocking, but disgusting as well. Who then, are the depraved people behind these atrocities?

The answer is as shocking as the headlines - Ministers of Religion, Bankers, Government Servants, School Children, Doctors, Policemen, Teachers, Mechanics - in fact, all ages, and all levels of society are represented in the ranks of Witchcraft and Satan worshippers.

Our modern way of thinking typically categorizes Witchcraft and Satanism as historical "Mumbo-Jumbo", an object of the "Dark Ages", and not an object that has part in the "Enlightened Nineties".

However, by looking behind the thin veneer of today's society, it is found that Witchcraft and Satanism is alive, well, popular, and growing in numbers of disciples. Over recent years, Witchcraft and Satanism has subtly thrust its tentacles into the very vitals of our society.

It is difficult, for people who are unfamiliar with the occult, to understand how anyone could get involved with 'Devil Worship', and the blood rituals of Witchcraft and Satanism.

Commander Bob Vernon, of the Los Angeles Police, comments:

"For one thing, I know that there is a spiritual hunger among people today. Many of them have gone to a church and haven't found the answer to that hunger. Someone comes along and offers them a feeling of belonging, a sense of being loved by a group, and they fall for it. There are other reasons, of course, but longing for acceptance, and a place in the world, is what I see as being a very important part of the insane direction many are taking in the supernatural."

From the accounts of people who have "come out" of Witchcraft and Satanism, it is possible to identify the common roads that can lead an unsuspecting person into Witchcraft and Satanism:

1) **Invitation** - Many ex-occultists indicated that they had relatives in previous generations who had been involved with Witchcraft and Satanism. From these inherited seeds, the later generation had also developed a personal interest. With these 'occult gifts' already in the family, it was therefore natural for family members to walk down the occult path.

2) **Dabbling** - Dabbling with occult practices, even with that which appears innocent, often leads a person into Satanism. Many people who were involved with the occult said that their

first exposure was playing 'glassy-glassy', or going to a 'Fortune-Teller', or attending some kind of spiritualist meeting.

3) **Transference** - The exchange of demonic forces from one person to another is known as transference. In the rituals of witchcraft and Satanism, sex is a key. The reason for this is that transference readily takes place during the sex act. In many covens the person to be initiated will, during his initiation rite, have sex with one or more of the coven's members. This act intensifies the channelling and transference of the promised demonic energy.

4) **Appeal** - Satanism can be very appealing with its promises of revealed secrets, power, money, control of others, sex, drugs, easy living, and group acceptance etc. In a 'confusing world' of changing values, people can be attracted, then recruited, to the 'promising' new world of the occult.

5) **Drugs** - Drug usage is widely practised in our society, and drug dependency can lead the addict to seek a Satanic coven for a ready supply of drugs and satisfaction of their craving. Remember that Satan is a master of controlling people through addictions.

6) **Music** - An important part of Witchcraft and Satanism is music. And much of the music enjoyed by people, especially young people, has been contaminated by demonic influences, and is performed by practising Witches and Satanists. As a person listens to this 'evilly charged' music, negative vibrations within the recording weaken their resistance to evil. And with their weakened resistance, they more easily respond to occult influences.

7) **Teachers** - One of the most frightening discoveries made about Satanic recruitment was that many people indicated that they had been introduced to Satanism by one of their school, college, or university teachers. The educational structures are fertile recruiting grounds for new coven blood.

8) **Friends** - Peer pressure and influence must never be underestimated where Satan is concerned. It was reported that a large number of people got involved with Satanism through a friend, or through a person who they respect.

A question that is often asked is: Cannot the Police help us to eradicate this evil from our midst? The police are aware of the growing danger, and do not hesitate to prosecute persons who break the law. However, religious worship, which includes Witchcraft and Satanic worship, in itself is not illegal.

Major Kobus Jonker, head of the Murder and Robbery Squad in Port Elizabeth, was asked how widespread and serious Witchcraft and Satanism really was in South Africa. He said that every city, every town, and even rural areas have their growing quota of active Witches and Satanists who were drawn from every level of society. He added that these followers of the occult actively prayed against churches, and delivered curses on Christians who were dangerous to them. Major Jonker also commented that these curses were effective. In conclusion he reiterated that the cure for this Satanic epidemic does not lie with the police alone - the public must be educated, and the cure must come from within the community.

### **Warning**

**Going out alone on a witch hunt, or going on a crusade can be very dangerous for the ignorant and unprepared. Evil will never be conquered by force, in fact it feeds upon it. Light must replace darkness, truth must replace falsehood, and good must replace evil.**

Only a society that is clean within itself is ready to overcome the menace of Witchcraft and Satanism. Therefore, the key to Satan's defeat lies in individual righteousness. Righteous individuals generate righteous families; righteous families generate righteous communities; and righteous communities generate a clean society. The battle is upon us and the lines are drawn. We must choose this day which road we will follow, but we must choose well; for, make no mistake, our future depends upon our choosing!

End
